## ***Electronic Data Notice***

**!! URGENT !!**

**Date:** 26 February 2009

**Applications:** JeppView  
JeppView FliteDeck  
JeppView MFD  
FliteStar  
Jeppesen Internet Flight Planner (JIFP)  
JetPlanner  
MilPlanner  
e-Link for Windows  
eCharts for Windows  
Military Moving Map

**Subject:** *Incorrect Grid MORA Values  
Worldwide*

Many Grid Minimum Off Route Altitudes (Grid MORAs) are incorrectly displaying a value “-50” in the electronic applications listed above, instead of the correct value of “UNK” (unknown). This value “UNK” reflects the fact that there is no altitude information available to enter in these data fields for that particular Grid MORA. The Grid MORAs with the incorrect values are generally located below S77° and above N85° (Antarctica and the Arctic Circle, respectively), however due to the fact that “UNK” Grid MORAs do exist all over the world, “-50” appears in locations other than below S77° and above N85°.

**THEREFORE, WHEREVER THE VALUE -50 IS DISPLAYED, IT REPRESENTS AN UNKNOWN MINIMUM OFF ROUTE ALTITUDE FOR THAT GRID.**

Jeppesen is actively working to remedy this display issue. We are also working to obtain altitudes for GRID MORAs where no altitude information currently exists. This will ultimately allow us to replace “UNK” values with the appropriate Grid MORA value.

**WE STRONGLY URGE YOU TO MAKE THIS INFORMATION AVAILABLE TO APPROPRIATE CREW MEMBERS IMMEDIATELY!**

If you have any questions concerning this Notice, please contact Charting Technical Support at:
