Jeppesen FliteDeck Pro
Trusted leader of the EFB evolution.

FliteDeck Pro provides pilots with navigational charts, manuals and documents needed for paperless flying, and delivers it all via an intuitive pilot- and workflow-focused interface.
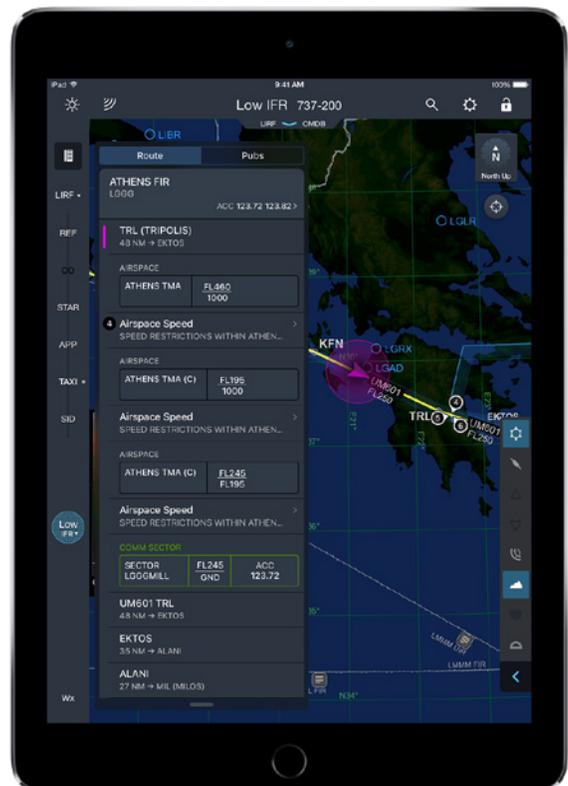

FliteDeck Pro is backed by more than 80 years of trust and reliability in global flight ops. No other provider even comes close. You can be confident that your operation will benefit from Jeppesen's focus on quality and accuracy, and from our world class customer support teams. We'll be with you every step of the way, 24/7, to assist your operation with guidance and support, wherever and whenever needed.

Here are some of the capabilities FliteDeck Pro offers

Interactive, dynamically rendered charts and data—all backed by Jeppesen quality.

- ⊘ SmartNotes cuts through the clutter to intelligently deliver pertinent flight information based on chronological and geospatial data, and minimize pilot interactions with the mobile EFB device.

- ⊘ Tailored Enroutes allow you to supplement Jeppesen's dynamic enroute data with your own operationally specific and relevant data.

- ⊘ Airport Moving Map improves pilot situational awareness during ground movements at airports through an ownship symbol depicted on detailed, dynamically rendered airport maps.

- ⊘ Best-in-class, optimized, vector image rendering of updated chart data delivered directly to iPad® or Windows® tablets.

- ⊘ A local database resident on the device allows pilots to see the information they need, as they need it, without worrying about connectivity.

FliteDeck Pro customers also have access to the backup solution, Trip Kit On-Demand, giving you a safety net for getting navigational information to pilots in the event of network, hardware or connectivity issues.

Our SmartNotes feature elevates information pilots require when and where pilots need it.

Additional chart and data capabilities.

- Import and interlace your company charts with Jeppesen charts and access them from a single point.

- VFR and cultural data layer to support VFR operations*.

- SIDs and STARs can be rendered directly on the enroute map.

Easy-to-use, intuitive interface.

- FliteDeck Pro was designed by pilots, for pilots, to include all of the capabilities needed without complexity.

- Upon landing, FliteDeck Pro switches to the airport diagram or Airport Moving Map automatically.

- A dedicated night theme makes flying at night as clear as day.

- Engine-out workflow provides one-tap access to engine out charts.

- Flight plan route integration so you can quickly import routes.

- Lock button for the screen secures a particular view of the chart, eliminating the chance of losing a view by accidently touching the screen.

- Preview charts quickly and add them to the chart clip for easy reference.

- Fast rendering capabilities and download speeds combined with low storage-space requirements save you time—no waiting.

All the information and capabilities pilots need for increased situational awareness—where and when they need them.

- At-a-glance distance measurement and auto calculation of off-map position distance when ownship is enabled.

- Ability to enter as many alternate airports as needed for flexibility.

- Ability to save flights for later reference.

- Highlighting tool allows pilots to easily highlight taxi instructions or approach information.

- Weather overlay allows crews to have the best information on current conditions.

- Rubber banding functionality and the ability to add user waypoints make route planning quick and simple.

- Printing capability for terminal charts so pilots can print paper back-ups on demand.

Why FliteDeck Pro

You will have everything you need for increased decision making power, when it counts.

- It is a complete solution—quality charting and data, tested user experience, training, support and services designed to help you be completely mobile.

- Jeppesen Distribution Manager (JDM) Pro for secure and fast data and content distribution.

We can help you go mobile.

- Enterprise Mobility Management (EMM)—Jeppesen works with leading global providers of EMM solutions to aid in your mobile transformation.

- Our world class team of dedicated professional services experts can help you every step along the way—from initial business case to implementation and training.

- We also offer an extensive library of training resources to get your pilots ready to fly as quickly as possible, and without the heavy flight bags!

*Coverage for contiguous United States and select parts of Europe.

System requirements

FliteDeck Pro 9.0

- Touch enabled tablets running Windows 10

FliteDeck Pro 3.0

- iPad running iOS v10 or higher
- Recommend iPad Air or higher
