

Jeppesen Weather

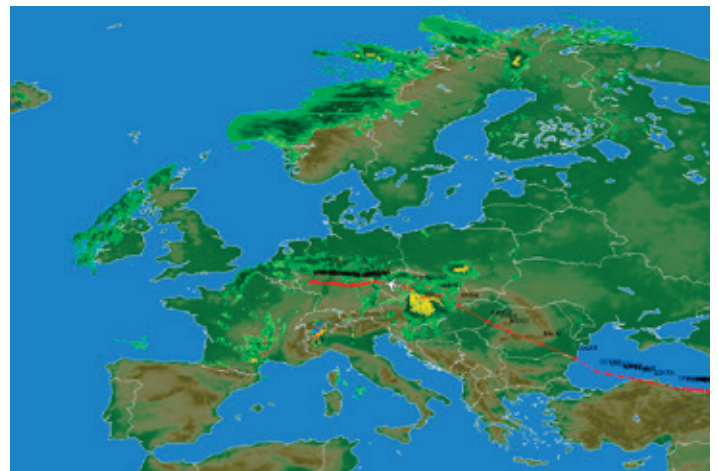

Powered by The Weather Company, An IBM Business

Jeppesen and Boeing have teamed with The Weather Company, an IBM Business (formerly WSI) to provide world-class global weather to all of our customers. We will soon provide global turbulence and icing forecasts, HIWC analysis and forecast areas, High Level Significant Weather and Wind Temp forecasts, as well as radar, satellite and lightning data from the weather company to help you make the best decisions when it comes to weather.

Together with The Weather Company, we will also be able to provide custom forecasts for your operation. Whether it's a flight route briefing or a custom TAF, their expert aviation meteorologists are now available to Jeppesen and Boeing customers.

Benefits of Jeppesen Weather include:

- ☑ If you were already using The Weather Company data, you will now have that data in your in-flight Boeing and Jeppesen applications, such as FliteDeck Pro and Aviator.
- ☑ Expanded radar coverage, including Europe, Japan and Australia.
- ☑ The power of IBM and weather is being leveraged to offer the most accurate weather forecasting available with The Weather company to offer the most powerful accurate forecasting available.
