

Charts and Navigation Workshop

Course Description

This workshop thoroughly covers the details of Jeppesen charts and text pages, including: airport, approach, departure, arrival, enroute, oceanic and polar. It will teach experienced chart users advanced insight into the critical information and subtle nuances of the procedures depicted on Jeppesen charts. This course also provides an overview of various ICAO and local rules/regulations, and can be tailored to address your airline's specific route structure and airports.

Who Should Attend

Flight crew members, flight operations officers, dispatchers and Aeronautical Information Services (AIS) personnel.

What You Will Receive

A comprehensive package of training and reference materials: charts, maps and navigational information, organizer and Jeppesen graduation certificate.

Course Length and Pricing

The course is offered on an ad hoc basis and is 2-days in length. Pricing is based on training location and duration. Contact us for more information.
