

Commercial Aviation Ground Training

Global Course Schedule

Worldwide Training

Jeppesen maintains approvals with many different Civil Aviation Authorities (CAAs) worldwide, and offers a wide range of basic through advanced training courses in online or live classroom settings. Courses are available for individual or group registration, and groups (minimum of seven attendees) can schedule custom class dates at multiple locations, or at any customer training facility. Pricing outlined in this schedule represents individual student costs, however discounted group pricing is available upon request.

Online Classroom Training

The Jeppesen Virtual Learning Program (VLP) is an online distance learning solution. VLP classes provide the same live classroom, instructor-led training, but are attended over the internet. The VLP classes are **not** computer-based training, and students are held to the same live classroom standards by way of interacting with instructors using webcams, voice and text communications. VLP provides customers with a more convenient and cost effective means to attending instructor-led training.

Live Classroom Training Locations

Regular or custom classes are available at the following locations;

- Denver, Colorado, United States (main campus)
- Crawley, United Kingdom
- Kingdom of Bahrain
- Kuala Lumpur, Malaysia
- Nairobi, Kenya
- Shanghai, China
- Singapore

Program Tailoring

Jeppesen can tailor training programs to fit your operational needs, including training on specific aircraft types, company operating specifications and specific software tools used on the job—such as electronic charting, flight planning, weather and airport analysis.
