Boeing Learning Solutions

Industry-leading theoretical content and examination delivery for training pilots and maintenance engineers.

Boeing Learning Solutions provides Aviation and Maintenance Training Organizations (ATO/MTO) with a dynamic solution to manage and deliver an integrated learning program.

Features:

- Integrated curriculum for customized learning programs
- Guidance materials to support learning programs
- System supports interactive, aircraft specific content and evaluation
- Modern, intuitive user interface
- Engaging learning content
- Offline availability
- Advanced learning statistics
- Multiple operating systems support (download for Windows, MacOS and iOS)
- Fully automated and electronic system complying with regulatory requirements
- Flexible and customizable questionnaire database available supporting student practice or course examinations

Benefits:

- Learning content organized to required regulatory footprint
- Quality and consistency of content maintained within a single-source database
- Digital and continuous updates for content and software
- Ability to customize content and maintain control of training documents
- Secure records management and document archive
- Controlled learning environment and performance tracking
- Minimal requirements for IT infrastructure

Value:

Boeing Learning Solutions provides a powerful learning system that enables ATOs and MTOs to deliver standard or customized theoretical learning content aligned with a robust questionnaire database for all licenses and training levels.
