

Crew Bid, Configuration

Course Description

Crew Bid, configuration

Course Description

Audience

This course addresses expert users and web-developers who are familiar with the Jeppesen Crew Bid software, and are responsible for maintenance and development of user installation at customer site.

Prerequisites

Good knowledge in: Maven, Java, JavaScript, HTML, CSS.

Basic knowledge in: Command line usage (Linux), Wildfly, Angular.js, RPM installation.

Duration

3 days

Course goals

This course gives you a deep understanding of the Crew Bid customization layer and the application configuration. After completing the course you will be able to:

- use and understand application environment (editor, application server, database)
- configure property files and logging
- build a new release
- perform changes to the customization layer, that is add a new bid, change/add validation rules
- troubleshoot both the application and the environment.

Course topics

- Configuration files
- Feed/External data sources
- Core and user
- Techniques used
- Customization

All exercises are done using generic flight data and rule sets.
