**REVISED NOTIFICATION  
CHANGE TO CYCLIC RELEASE STATEMENT/  
STATEMENT OF CONFORMITY**

07 December 2018

The following is an update to the Notification published on 31 October 2018.

In accordance with EASA Requirements, Jeppesen will begin providing a Statement of Conformity with each NavData database. This document serves as the required advanced notification for implementation of the updated requirements beginning in AIRAC cycle 1902, effective date 31 January 2019.

**BACKGROUND**

EASA (European Aviation Safety Agency) will change their data service provider acceptance process from the current Letter of Acceptance (LOA) conditions to a new DAT (Specific Requirements for Providers of Data Services) certification effective 1 January 2019. As part of this change, new requirements are introduced requiring a Statement of Conformity be delivered with each database.

As a worldwide leader in aeronautical navigation data, Jeppesen is complying with this requirement from EASA as well as the current FAA requirements. Jeppesen recently achieved EASA DAT certification. Certificate Reference: EASA.AOA.DAT.019.

**SUMMARY**

Beginning with AIRAC cycle 1902, a .pdf document will be delivered directly to customers in conjunction with each NavData database. Jeppesen will continue posting the present NavData Release Statements on Jeppesen.com for several cycles on <http://ww1.jeppesen.com/company/publications/loa.jsp>. The following pages contain examples of both the current Release Statement and the new Statement of Conformity. The "database identification" field on the new form indicates the name of the file that the Statement of Conformity applies (Formatted as: Database Name + Release Date + AIRAC Cycle + Version).

This change will only be applicable to NavData produced by Jeppesen. This change will have no impact on the format or content of the individual NavData production file delivered each cycle.

**CLOSING COMMENTS**

This Notice is strictly information and requires no action by Jeppesen NavData customers. If you have Technical questions about this Notice, please contact Jeppesen NavData Technical Support at phone (USA) 303-328-4445, e-mail [navdatatechsupport@jeppesen.com](mailto:navdatatechsupport@jeppesen.com).

NavData Notices are intended for Jeppesen's Original Equipment Manufacturer (OEM) Customers only. End Users of the data may contact their Avionics Providers with questions on the availability of data in their specific units.

## Jeppesen NavData LoA Release Statement

| AIRAC Cycle                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Date of Release |

| <p><b>Declaration of Conformity:</b></p> <p>ARINC 424 databases released and distributed by Jeppesen are produced using processes accepted by the US Federal Aviation Administration (FAA) and the European Aviation Safety Agency (EASA) as meeting the requirements defined by the respective agencies. Jeppesen has been audited by these agencies and is the holder of a current Type 1 Letter of Acceptance (LoA) which serves as demonstration of compliance to the appropriate requirements.</p> <p>The content of the ARINC 424 databases are derived primarily from official state documents, such as state specific Aeronautical Information Publications (AIPs), issued into the public domain per ICAO annexes and other regulatory guidance material. Additional sources such as ATC, airport managers and other state agencies are also used to confirm, verify and/or validate, to the extent reasonable, information contained in AIPs and other similar documents.</p> <p>Jeppesen, in the role of a value added data consolidator, combines source from over 220 discrete countries and checks the global dataset, to the extent reasonable, for consistency and conformity to established data standards. When inconsistencies or errors are detected and where possible, Jeppesen modifies the suspect data. Since Jeppesen is not a data originator, when we modify information contained in a state's AIP, it is based on other reliable information. Although not an originator in the classical sense (survey, procedure/airspace design, measurement ... etc.), the Type 1 LoA guidelines consider this type of modification to be "origination". Originated data under this definition is maintained (processed) in the same Type 1 LoA quality system.</p> <p>A listing of Jeppesen originated data, per the above definition, is included with your data delivery for your review. Please direct any questions regarding data on the listing to Jeppesen Technical Support.</p> <p>The data in this release cycle may include customer tailored data not originating from a state authority. For this data, the end user must satisfy itself for suitability with intended use.</p> |                 |
