

Jeppesen JetPlanner

Reduce cost and increase efficiency through optimized flight planning.

JetPlanner enables dispatchers and flight operations staff to generate optimized routes and first-time flyable flight plans, resulting in lower operating costs. The powerful, end-to-end flight planning solution uses a unique fuel, time and cost performance index to reduce fuel cost, flight times and overflight charges. JetPlanner offers outstanding ease-of-use and flexibility through an intuitive graphical interface and configurable automation. JetPlanner is specifically designed to fully leverage the advanced route optimization capabilities of our industry leading flight planning engine and is available as a hosted or local solution.

Increased efficiency in flight planning.

Highly capable system.

JetPlanner is well suited for airlines that require the following.

- Multiple scenario analysis for optimized route planning in complex airspace.
- Intuitive graphic interface lets you create, visualize and modify flight plans quickly.
- Rules-based configurable automation.
- Integrated Jeppesen NavData.
- Customizable templates for repeat requests.
- Integrated flight critical information, including weather, NOTAMs, alerts and filters.

- Manipulate routes graphically with rubber-band functionality.
- Graphical weather overlays for situational awareness.

Boost the bottom line.

Jeppesen JetPlanner offers the following benefits for your airline.

- Lower operational cost through reduced fuel consumption, flight times and overflight charges.
- Increased passenger satisfaction through improved disruption risk management.
- Increased employee satisfaction through configurable automation that empowers dispatchers to focus on more complex assignments.

Uncompromised service and support.

- Jeppesen offers full consulting, training, implementation and technical support through our global Customer Solutions team, available 24x7x365.

Part of an integrated portfolio.

- JetPlanner is part of the most robust flight optimization portfolio on the market today, offering end-to-end efficiency through all phases of flight. See our flight optimization solutions for more information.
