# Jeppesen Aviator Dashboard

Aviator Dashboard, a module available as part of Jeppesen Aviator, offers pilots an at a glance view of key flight information from various integrated EFB applications. Twenty-three configurable dashboard tiles streamline a pilot's workflow and automatically directs them to more detailed information with just the touch of a finger.

Aviator Dashboard includes:

- Graphical Route Overview for improved situational awareness
- Depiction of current weather along route
- Tailored workflow can be achieved through 23 dashboard tiles
- One-touch uplink aircraft connectivity
- Quick access to integrated Jeppesen applications
  - Quick one-touch access to origin and arrival charts within Jeppesen FliteDeck Pro
  - Quick one-touch sharing of the route in FliteDeck Pro
  - Automatically share flight plan data with Boeing Onboard Performance Tool
- Secure pilot authentication with Jeppesen FliteBrief

Aviator Dashboard is just one module in the Jeppesen Aviator suite of EFB solutions.
