

# Jeppesen PilotPak

## What is Jeppesen PilotPak?

Jeppesen PilotPak is a convenient, bundled service that provides all the databases and charts needed for your Garmin avionics (GTN-series/G1000/G2000/G3000). All of the airspace, airport and navigation information is kept up-to-date on either a 14- or 28-day cycle.

## Why should I choose Jeppesen PilotPak?

Offers bundled pricing options, so you save compared to purchasing individual data/chart services.

Data quality pilots have trusted to guide them home for more than 85 years.

Global standardized library of charts and databases, with many options for regional coverages to fit your flying needs.

Integration of Jeppesen charts in your PilotPak with popular mobile apps, such as [ForeFlight](#).

Manage your data updates with the [Jeppesen Distribution Manager](#) app, plus you can perform wireless updates using the [Bad Elf Wombat](#) device.

## How does it all work together?

Here's an overview illustrating how Jeppesen PilotPak supports the various phases of flight, and works together as a complete system with your avionics and mobile app.

Please keep in mind, these differences when comparing Jeppesen PilotPak to other data and chart providers:

- Jeppesen chart services are updated every 14-days vs. other services that update every 28-days. This means you'll have more current information and less reliance on NOTAMs.
- Jeppesen departure and arrival charts (SID/STAR) are shown to-scale, so you'll be able to see your ownship position spotter on the procedure for better situational awareness.
- You'll get licenses for integrating your Jeppesen charts with the most popular mobile apps, like ForeFlight and Garmin Pilot. There is no additional fee for this feature and you're not locked into one particular app.
- Jeppesen employs a team of in-house technical support experts, who are ready to help 24x7.

### Phases of flight

		Planning	Taxi	Departure/Climb	Cruise	Approach/Land	Taxi
Databases included in Jeppesen PilotPak	<b>14-day update cycle</b> Jeppesen Charts						
	<b>28-day update cycle</b> Jeppesen NavData						
	<b>56-day update cycle</b> Garmin SafeTaxi						
	<b>56-day update cycle</b> AOPA & AC-U-KWIK Airport Directory						
	<b>365/56-day update cycles</b> Terrain/Obstacles						

## Next steps
