

Duane Wehking

**Vice President
Digital Solutions and IT & DA Business Partner
Boeing Global Services, Boeing**

Duane Wehking is the Vice President of the Digital function and Information Technology (IT) & Data Analytics for Boeing Global Services. In these dual roles, Wehking leads the technical support for Global Services and oversees the digital products and services developed by Global Services.

As leader of Information Technology and Data Analytics, Wehking oversees the technical support for all businesses and functions across Boeing Global Services. Wehking is responsible for the development and implementation of IT's strategy, execution of the IT long range business plan and developing innovative solutions to ensure successful execution of the Boeing Global Services business plan.

Wehking also leads the Digital function for Boeing Global Services. This function defines, designs and supports the industry's broadest portfolio of aviation data, charting and operational efficiency solutions. Digital products span four key aviation markets – commercial airlines, military, business aviation and general aviation – and ten domains: Flight Deck Solutions, Data Solutions, Maintenance & MRO, Leasing Solutions, Crew Management, Flight Planning, Managed (Industry) Solutions, Analytics Solutions, Network & Ops Management, and Business Consulting.

Prior to his current role, Wehking led the IT Common Services organization where he was responsible for the management and delivery of enterprise-wide IT services.

Wehking has held numerous leadership positions in Information Technology supporting Business and Supply Chain Systems, including Strategy and Planning, Enterprise Accounting Systems, Finance Systems, Integrated Production and Supplier Management Financial Operations.

Wehking began his career at Boeing in Wichita, Kansas. He has more than 20 years of experience in technology disciplines. He has a bachelor's degree in Business from Wichita State University.
