

Jeppesen Distribution Manager Pro

Deliver flight relevant content directly to your pilots' mobile devices

Jeppesen Distribution Manager Pro (JDM Pro) is a cloud-based data distribution management platform that securely distributes data to Jeppesen and Boeing applications, such as FliteDeck Pro, Aviator, and OPT. JDM Pro collects, organizes, and optimizes navigational and other relevant content from multiple sources, and delivers it to mobile EFB applications.

The Jeppesen advantage

- ✔ JDM Pro is the most trusted and most used data distribution system in the industry; distributing 40TB of data per month to over 400 aviation organizations and over 400,000 devices
- ✔ Updates to content using delta sets reduce data transfer volumes and operating costs, and save pilots time while on the run
- ✔ JDM Pro reduces the likelihood of operational disruptions as the industry's most used and most trusted content distribution platform
- ✔ JDM Pro has enabled over 110,000,000 paperless flights

Key benefits of JDM Pro

- ✔ **Efficient Downloads** – JDM Pro encrypts, compresses, and optimizes data for fast and secure downloads of content
- ✔ **Group Based Assignments** – By using Groups, administrators can quickly assign content to multiple pilots in a way that is customizable to their operations
- ✔ **High Availability/Disaster Recovery** – JDM Pro is built to be secure, scalable, and reliable
- ✔ **Secure Connections** – JDM Pro secures all communications, and uses device/application certificates to ensure safe and easy authentication by end users
- ✔ **Device Status** – Administrators are able view the status of mobile devices and the content on those devices
- ✔ **Minimize Labor Investment** - By automating EFB content management and distribution, operators can save time and money
- ✔ **Multifactor Authentication** - JDM Pro uses industry leading authentication methods to ensure secure access by administrators
