

## Training Product Update

*Reengineered Metal CSG (E6-B) Computer*

### METAL CSG (E6-B) COMPUTER

Updates to item 10001317-002 include:

- Reengineered to provide higher quality, durability and accuracy
- New non-glare Teflon coating for smoother operation
- No price increase

### Product Description

Solving low and high-speed problems is a cinch with the help of our heavy-duty Metal CSG Flight Computer. It quickly calculates time, speed and distance problems, density altitude, true airspeed, wind correction angles, and countless other solutions. A must-have for FAA written tests and when planning and flying cross-country trips.
