

UPDATES TO JEPPESEN ONLINE PILOT TRAINING COURSES

We have updated the Jeppesen online pilot training courses to HTML5. The courses were originally authored in Adobe Flash, which is no longer supported in common browsers (Internet Explorer, Firefox, Chrome, etc.).

Along with the conversion, the courses have received some exciting new functionality including support on all HTML5-compatible mobile devices (iOS and Android).

Jeppesen courses converted from Flash to HTML5 includes:

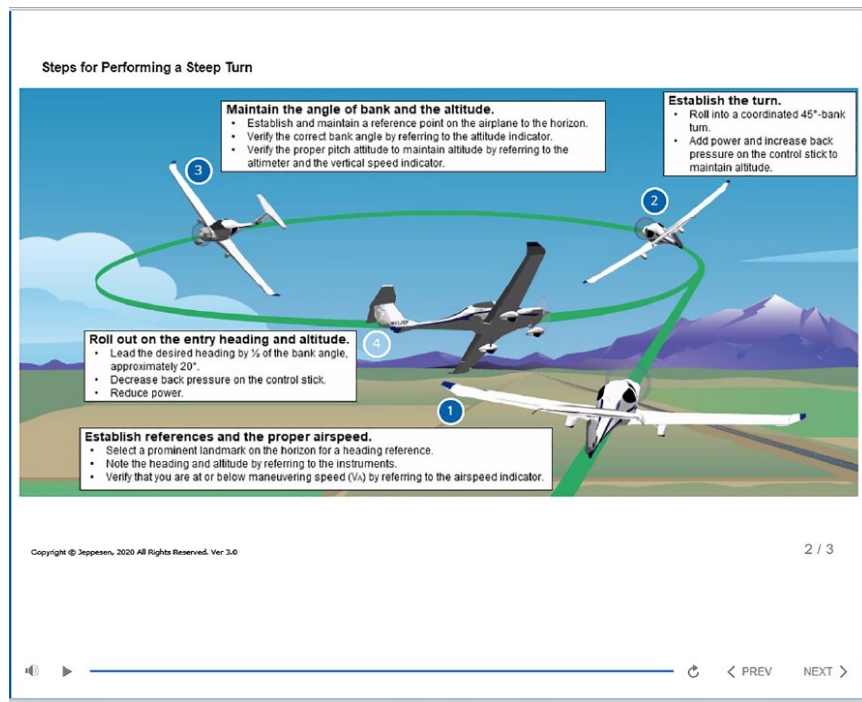

- Private Pilot Online Part 141 (item 10183560)
- Private Pilot Online Part 61 (item 10025785)
- Instrument Pilot Online Part 141 (item 10183561)
- Instrument Pilot Online Part 61 (item 10025801)
- Commercial Pilot Online Multi-Engine (item 10167248)
- Commercial Pilot Online Single-Engine (item 10164917)

What do customers need to do?

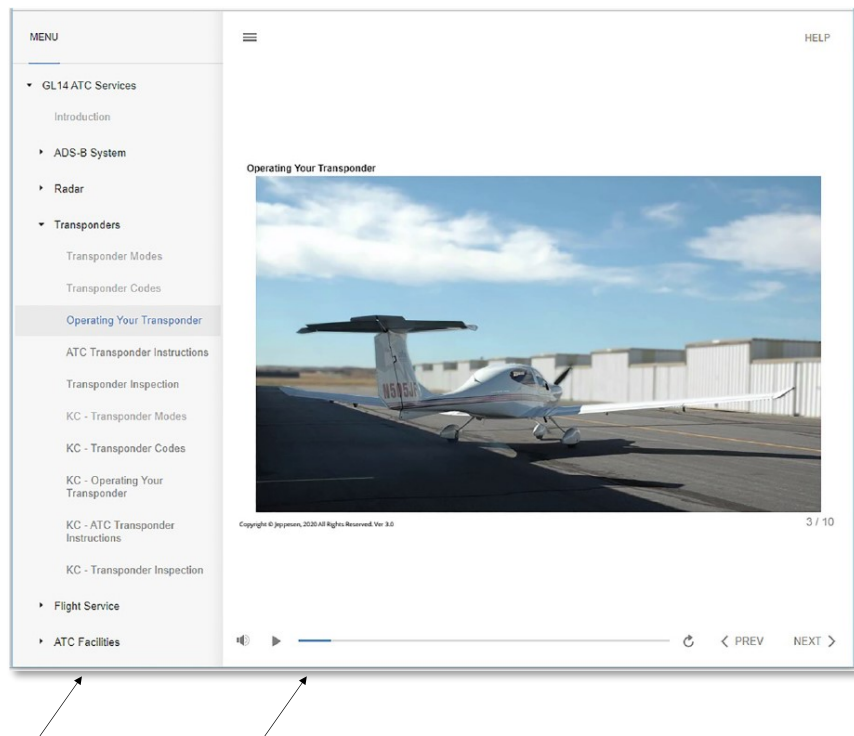

Great news! No action is required, and all the updates are seamless. While we addressed the Flash retirement, we also added new functionality to improve user experience.

What's improved?

- Learn on-the-go, anytime, anywhere with new mobile access—the HTML5 course content is compatible with iOS, Android and other HTML5-compatible mobile devices

- A new user interface is simple, easy-to-use and provides step-by-step guidance for students throughout the course

- An improved navigation menu and scroll bar showing progress are now available in the HTML5 version
- For a complete briefing on all improvements, please visit our [Online User Interface Guide](#)

What stays the same?

- The HTML5 lessons deliver the same rich content and graphics that was used in our Flash-based courses
- The HTML5 courses use the same product item numbers and [ecommerce pages](#) as the Flash-based courses
- The existing online reports did not change—the same fields that were reported through the Learning Management System (LMS) are available for the HTML5 courses
- Training organizations can access training records for the last 24 months

Flight Service	Completed	7/22/2020	0
ATC Facilities	Completed	7/22/2020	0
Summary	Completed	7/22/2020	0

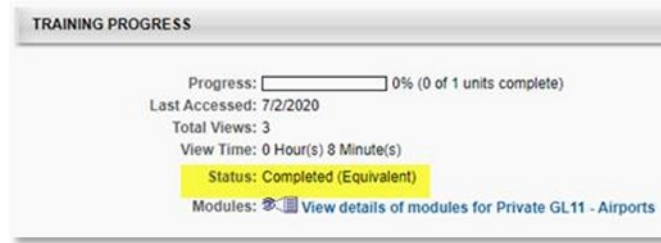

What changed?

- Now that all of the courses are converted to HTML5, the access and licensing terms have reverted back to one-year periods (vs. six-month periods). Prices at the start of 2021 are the same as the 2019 prices for the annual subscription.
- The Jeppesen Garmin G1000 online courses were not converted and have been discontinued (item codes 10025767, 10025768, 10176630 and 11151494)

Jeppesen deployment steps

For end users:

- For lessons completed prior to the HTML5 content conversion, the completion status changed from “Completed” to “Completed (Equivalent)” after the conversion

- Lessons completed in the Flash content will be reviewed in the HTML5 version now
- For lessons that were “In Progress” status during the conversion to HTML5, the lesson progress was reset and users started fresh with the HTML5 content
- For lessons that were in the “Registered” status, users started with the HTML5 content

For instructors:

Instructors run the report as usual. There are two changes to the existing Training Hours report:

1. Though the status of a completed course changed from Completed to Completed (Equivalent) in a student’s Training Details page after the conversion, the report will display the time spent in the course prior to the conversion with a Completed status.
2. Time spent in reviewing a course with Completed (Equivalent) status will not be tracked in the report.

We hope you find these updates and improvements helpful as you progress along your aviation journey.

Please visit our [Customer Support Portal](#) if you have any questions or need assistance with the Jeppesen online courses.
